TO BUILDERS, PLUMBERS, AND FITTERS.

UNDER the SANCTION of the BOARD of HEALTH.—The undersigned is manufacturing complete POTTERY WATER-CLOSETS, and also SELF SUPPLYING and DISCHARGING FOUNTAIN BASINS, for the use of public buildings and private dwellings, of a most convenient, durable, and cheap description. He is now prepared to treat with parties who have the means, hands, and connections to make an extensive trade in this way. None but respectable parties need apply, and a reference will be expected. The above applies to London and its vicinity, and to all places where the Health of Towns Bill is about to be introduced, as well as to all large towns in the United Kingdom.—JOHN SIDGWAY, Cauldon-place, Staffordshire Potteries.

TO ARCHITECTS, BUILDERS, &c.

ATTENTION is requested to the DIRECT ACTION BALL TAPS, invented and patented by T. H. THOMPSON, C.E.

In these Taps the old-fashioned lever is done away with, whose dancing action whilst the water was being admitted, soon wore out the cone, and rendered the cock unsound.

The Direct Action Ball Taps cannot blow up or down, thereby either flooding or leaving premises with no water; a fault which all similar contrivances possess in an eminent degree.

They will fill a reservoir in less time than any other tap of similar dimensions, on account of the water not having to pass upon till the water in cisterns is within one inch of the required level, when they shut off without possibility of leakage.

The perpendicular principle, with compensating valve inside, renders this action unerring and perfect under any pressure whatever.

Specimens can be seen in action at the office; and all necessary information, with drawings, forwarded by application to T. H. THOMPSON, C.E., 23, Parliament-street, Westminster.

MANUFACTURERS of GLAZED STONEWARE PIPES, Bends, Junctions, &c., also FIRE BRICKS, Vitrified Blue Bricks as used by her Majesty's Commissioners of Sewers, Wake Fire Clay, Facing Bricks, &c., &c. Agents.—Messrs. FREEMAN and RICHARDSON, No. 6, South Wharf, Paddington, London; Mr. W. RAWLINS, Bangor Wharf, Camden town; and Messrs. HERTSLET and Co., Adelphi Wharf, Strand.

IMPROVED DRAINAGE.
BY ROYAL LETTERS PATENT.

STANDING, FRANKLIN, & STANDING, Sole Patentees and Manufacturers of the PATENT GLAZED STONE WARE SEWAGE PIPE. Offices, 23, Cornhill, entrance by Change-alley; Factory, Brunton's Wharf, Commercial-road, Limehouse.

By employing their patent machinery, S. F. and S. are enabled to produce a pipe for sewage and other purposes in every way far superior to those made by any other process, but more especially in those qualities so absolutely essential to a perfect, and cleanly mode of drainage. From the great and uniform amount of pressure, and peculiar construction of the machinery allowing the air to escape, used in manufacturing, their pipes are entirely free from air bubbles, proving their greater strength, durability, and entirely preventing the contents permeating through; they are much smoother on the inside, insuring a perfect passage for the sewage, and preventing any deposit.

STRAIGHT TUBES WITH SOCKET JOINTS, BENDS, JUNCTIONS, TRAPS, CLOSET PANS, Water Guns, and Chemical Pipes, Architectural Ornaments, Vases, Chimney Pots, &c. Shipping and London orders executed to any extent.

Specimens may be seen at the offices, 23, Cornhill, where prices, &c., may be obtained, and licenses granted for the use of the patent machine.

No. 4 in three pieces.

CHEAP WATER-CLOSET PANS,
with Syphon Traps,
IN GLAZED STONE WARE.
PRICE 7s. 6d. EACH.

The above WATER-CLOSET PANS are of the most simple yet perfect construction; they are CLEANLY and IMPERISHABLE, requiring no metal fittings, and the price at which they are offered is so low, as to admit of their universal adoption.

JAMES STIFF, MANUFACTURER of GLAZED STONE WARE DRAIN PIPES,
BENDS, JUNCTIONS, TRAPS, &c., 39, HIGH STREET, LAMBETH, LONDON. Established 1751.
Water Closet Pans, with Syphon Traps, 7s. 6d. each.
STRAIGHT TUBES, with Socket Joints, 10½ feet lengths.

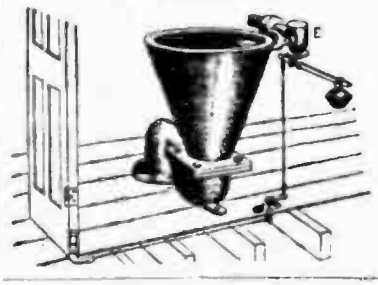
N.B. These are made without the Junctions-hose being turned downwards.

The great advantages attending the use of these articles are not so generally understood, as to render any remonstration of them almost superfluous. Their cheapness, efficiency, and durability, are universally admitted, while it is rapidly increasing demand for them proves their estimated superiority over every other kind hitherto before the public for similar purposes.

Inspection is invited to an extensive stock of Drain Tubes of every form and size, adapted to the various situations for which they may be required, as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and to other finer glaze for surfaces and other manufactured of Brown Stone Ware.

May be had also at Messrs. GLADDISH'S LIME WHARFS, Pedlar's Acre, Westminster-bridge-road; Old-road Wharf, City Basin; Peckham; Bermondsey; Deaver's Wharf, foot of Battersea Bridge, Chelsea; Pratt Wharf, Kingsland, Camden New Town.
Drawings and List of Prices will be forwarded on application.

IMPORTANT IMPROVEMENT IN WATER-CLOSETS.



The undersigned have the honour to announce, that they have invented and patented a new and improved Water-Closet Pan, which they are now manufacturing, and which they believe to be the most perfect and effective yet produced, combining, as it does, the following advantages:—

CHEAP AND EFFECTIVE MODE OF INSURING THE USE OF WATER.

Other arrangements,—and supplying, by pressure on the seat, or on lift with a handle, as the ordinary cocks, may be seen at the manufactory.

The basin, patent valve E of large diameter, flap, lever, weight, and handle, are all fixed together with bolts and nuts, and are exceedingly strong and durable, and may be fixed at a very small cost.

The price, complete, is only 2s.

SUPERIOR GLAZED STONEWARE DRAIN PIPES, invented and manufactured by WILLIAM NORTHEN, UNION POTTERY, No. 24, VAUXHALL WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, engineers, builders, water companies, &c., that he has completed Machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON TRAPS, &c. &c., whereby the many advantages of pipes made by this machinery over all others may be demonstrated, that is, thereby perfect and equal in form and size, and all pipes and articles, the flow being as different as water is from mud, and other sewage, to that which the pipes and articles being made by other processes are liable to produce.

W. N. refers particular attention to the superior quality of the glaze used in his manufactory, which is equal in colour, to the glazing of pipes in the Staffordshire Potteries, and is not liable, like the Salt glazed drain, to become discoloured in a short time. W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES WHERE THEY ARE NOW BEING LAID:—
